

CLOUD BUSINESS MANAGEMENT

From first contact to payment. Without losing the thread.

Sales, purchasing, documents, e-invoicing, payments, inventory and projects in one connected flow — every step uses the same data, and every flow can follow the real rules of your business.

Sales & purchasing

Quotations, orders, delivery notes, invoices and supplier documents — with order-to-cash and procure-to-pay automation.

Electronic invoicing

The Italian SdI flow inside the ERP — XML, sending, receiving and monitoring for PA, B2B and B2C.

Customers & relationships

Fiscal data, terms, contacts, email and WhatsApp communications, activities — one record, full history.

Inventory

Catalogue, multi-warehouse stock, automatic movements from documents, replenishment before shortages.

Administration & analytics

Payments, due dates, operational accounting, cashbook and configurable KPI dashboards.

Automation & control

Automated rules, APIs, projects with WBS and timesheets, granular permissions, 2FA and audit trail.

The document flow

01

Quotation

Priced and versioned, ready to become work.

02

Order

Confirmed in one action — same data.

03

Delivery

Delivery notes that move inventory.

04

Invoice

Born from the documents before it.

05

Payment

Due dates and cash — visible, current.

See your flow, end to end.

Tell us how a sale runs through your company today — we'll show you the same journey inside Nebulas ERP.
